Updates to Voucher Management System (VMS) May Release

This updated error message is not specific to the cause of the error. User should look at the data entry fields for any one that is highlighted in yellow, and any field that contains a single number "0" zero. The number "0" is not a valid number in VMS, if nothing is to be reported, the field should be left blank.

Another issue known at this time is if a PHA goes into and changes a locked record. Since there is no way to blank or zero out the field, the PHA is being instructed to put a 1 in the field and with the comments state that this value is to be ignored. This issue will be corrected with the next release.
